# **PRIMARY ARTS AND HUMANITIES**

## **Kentucky Academic Standards – Arts and Humanities – Primary Level Grades K-3**

The arts and humanities instructional program in the primary level centers on an exploration of the art forms of dance, media arts, music, theatre, and visual arts. Instructional emphasis at the primary level should be placed on exposing students to a variety of arts through active experiences. This exploration includes a beginning of arts literacy development, simple analysis and critique of the arts, and active sharing of their work with others. Students should also begin making connections between the arts and their own personal experiences, along with beginning to realize how the arts convey meaning and reflect human experience. Students can begin to learn how they can use the arts to communicate meaning through their choices in the use of arts elements and principles.

### **The Standards**

The standards are directly related to the *National Core Arts Standards*. These are process standards, which are designed to engage students in artistic processes and creative expression as put forward in Senate Bill 1 (2009), KRS 158:6451, Section 1, Schools shall develop their students' ability to: "Express their creative talents and interests in visual arts, music, dance, and dramatic arts".

### **Standards Organization**

The standards are organized around four arts processes:

1. **Creating:** Conceiving and developing new artistic ideas and work

Creating involves planning and creating new dance, media arts, music, theatre, or visual arts. Creating may involve improvising in music, dance or theatre. Improvising is the composing of new music, reciting/acting new dramatic material, or creating new dance movements on the spur of the moment.

2. **Performing/Producing/Presenting:** Realizing artistic ideas and work through interpretation and presentation

Performing is limited to the performing arts of music, dance and theatre. Performing generally involves sharing previously created works with an audience. Although the process of performing involves following a creative plan conceived by a composer, playwright or choreographer, there is still opportunity for creative interpretations within the performance.

Producing is the process of sharing work in the area of media arts. Since media arts productions do not result in performances, the sharing process is different from the performing arts. Media artists still follow the same steps in the creation of works and preparation of works for sharing with others; however the result is more often a product such as a video or video game.

Presenting is often associated with sharing in more formal settings such as exhibition in the visual arts. The same steps to prepare works for presenting are considered-the audience, venue and communication aspects of an exhibition.

3. **Responding:** Understanding and evaluating how the arts convey meaning

Responding to the arts involves having the viewer take a close look to interpret the meanings in artistic works. The arts are created for the purpose of communication. Responding to them engages a thinking process that enables the viewer/audience to gather the intent of the work and the message being shared by the artist.

Responding also involves the process of evaluating art works. The viewer/audience will apply criteria to evaluate the effectiveness of artistic works.

4. **Connecting:** Relating artistic ideas and work with personal meaning and external context

Connecting involves both looking inward and outward. Artists use personal experiences and gained knowledge to inform their own creative works. They also relate artistic ideas with the world around them; to society, culture, and history. This deepens the understanding of the work and appreciation of those who create the arts.

**Anchor Standards**

There are eleven Anchor Standards that are common across all art forms. These standards illustrate steps that are taken within each of the Artistic Processes.

**Performance Standards**

Each artistic discipline has a set of performance standards. These standards illustrate what each of the Anchor Standards might look like as students engage in the Artistic Processes within an artistic discipline. Performance standards are written for pre-kindergarten through eighth grade as grade level standards, and at the high school in three proficiency levels; Proficient, Accomplished and Advanced. All Performance Standards align to the eleven overarching Anchor Standards.

# **INTERMEDIATE ARTS AND HUMANITIES**

## **Kentucky Academic Standards – Arts and Humanities – Intermediate Level Grades 4 and 5**

The arts and humanities instructional program in the intermediate level continues with the exploration of the art forms of dance, media arts, music, theatre, and visual arts. Instructional emphasis at the intermediate level should continue to be on exposing students to a variety of arts through active experiences. This exploration includes the continuation of arts literacy development, simple analysis and critique of the arts, and active sharing of their work with others. Students should be making connections between the arts and their own personal experiences, along with connections to how the arts convey meaning and reflect human experience. Students demonstrate more confidence in applying the arts to communicate meaning, and through their choices in the use of arts elements and principles.

### **The Standards**

The standards are directly related to the *National Core Arts Standards*. These are process standards, which are designed to engage students in artistic processes and creative expression as put forward in Senate Bill 1 (2009), KRS 158:6451, Section 1, Schools shall develop their students' ability to: "Express their creative talents and interests in visual arts, music, dance, and dramatic arts".

### **Standards Organization**

The standards are organized around four arts processes:

1. **Creating:** Conceiving and developing new artistic ideas and work

Creating involves planning and creating new dance, media arts, music, theatre, or visual arts. Creating may involve improvising in music, dance or theatre. Improvising is the composing of new music, reciting/acting new dramatic material, or creating new dance movements on the spur of the moment.

2. **Performing/Producing/Presenting:** Realizing artistic ideas and work through interpretation and presentation

Performing is limited to the performing arts of music, dance and theatre. Performing generally involves sharing previously created works with an audience. Although the process of performing involves following a creative plan conceived by a composer, playwright or choreographer, there is still opportunity for creative interpretations within the performance.

Producing is the process of sharing work in the area of media arts. Since media arts productions do not result in performances, the sharing process is different from the performing arts. Media artists still follow the same steps in the creation of works and preparation of works for sharing with others; however the result is more often a product such as a video or video game.

Presenting is often associated with sharing in more formal settings such as exhibition in the visual arts. The same steps to prepare works for presenting are considered-the audience, venue and communication aspects of an exhibition.

3. **Responding:** Understanding and evaluating how the arts convey meaning

Responding to the arts involves having the viewer take a close look to interpret the meanings in artistic works. The arts are created for the purpose of communication. Responding to them engages a thinking process that enables the viewer/audience to gather the intent of the work and the message being shared by the artist.

Responding also involves the process of evaluating art works. The viewer/audience will apply criteria to evaluate the effectiveness of artistic works.

4. **Connecting:** Relating artistic ideas and work with personal meaning and external context

Connecting involves both looking inward and outward. Artists use personal experiences and gained knowledge to inform their own creative works. They also relate artistic ideas with the world around them; to society, culture, and history. This deepens the understanding of the work and appreciation of those who create the arts.

**Anchor Standards**

There are eleven Anchor Standards that are common across all art forms. These standards illustrate steps that are taken within each of the Artistic Processes.

**Performance Standards**

Each artistic discipline has a set of performance standards. These standards illustrate what each of the Anchor Standards might look like as students engage in the Artistic Processes within an artistic discipline. Performance standards are written for pre-kindergarten through eighth grade as grade level standards, and at the high school in three proficiency levels; Proficient, Accomplished and Advanced. All Performance Standards align to the eleven overarching Anchor Standards.

# **MIDDLE LEVEL ARTS AND HUMANITIES**

## Kentucky Academic Standards – Arts and Humanities – Middle Level Grades 6-8

The arts and humanities program in the middle level centers on establishing grounding in the arts so that students are able to communicate at a basic level in each of the art forms of dance, media arts, music, theatre, and visual arts. Emphasis should be placed on exposing students to a variety of arts through active experiences. Students may have already begun to, or at this level may choose to focus on one art form for more in-depth study. This more in-depth study will help students to prepare should they choose specialization in an art form at the high school level. Working toward this grounding in the arts engages students in arts literacy development, analysis and critique of the arts, and active sharing of their own work with others.

### The Standards

The standards are directly related to the *National Core Arts Standards*. These are process standards, which are designed to engage students in artistic processes and creative expression as put forward in Senate Bill 1 (2009), KRS 158:6451, Section 1, Schools shall develop their students' ability to: "Express their creative talents and interests in visual arts, music, dance, and dramatic arts".

### Standards Organization

The standards are organized around four arts processes:

1. **Creating:** Conceiving and developing new artistic ideas and work  
Creating involves planning and creating new dance, media arts, music, theatre, or visual arts. Creating may involve improvising in music, dance or theatre. Improvising is the composing of new music, reciting/acting new dramatic material, or creating new dance movements on the spur of the moment.
2. **Performing/Producing/Presenting:** Realizing artistic ideas and work through interpretation and presentation

Performing is limited to the performing arts of music, dance and theatre. Performing generally involves sharing previously created works with an audience. Although the process of performing involves following a creative plan conceived by a composer, playwright or choreographer, there is still opportunity for creative interpretations within the performance.

Producing is the process of sharing work in the area of media arts. Since media arts productions do not result in performances, the sharing process is different from the performing arts. Media artists still follow the same steps in the creation of works and preparation of works for sharing with others; however the result is more often a product such as a video or video game.

Presenting is often associated with sharing in more formal settings such as exhibition in the visual arts. The same steps to prepare works for presenting are considered-the audience, venue and communication aspects of an exhibition.

3. **Responding:** Understanding and evaluating how the arts convey meaning

Responding to the arts involves having the viewer take a close look to interpret the meanings in artistic works. The arts are created for the purpose of communication. Responding to them engages a thinking process that enables the viewer/audience to gather the intent of the work and the message being shared by the artist.

Responding also involves the process of evaluating art works. The viewer/audience will apply criteria to evaluate the effectiveness of artistic works.

4. **Connecting:** Relating artistic ideas and work with personal meaning and external context

Connecting involves both looking inward and outward. Artists use personal experiences and gained knowledge to inform their own creative works. They also relate artistic ideas with the world around them; to society, culture, and history. This deepens the understanding of the work and appreciation of those who create the arts.

**Anchor Standards**

There are eleven Anchor Standards that are common across all art forms. These standards illustrate steps that are taken within each of the Artistic Processes.

**Performance Standards**

Each artistic discipline has a set of performance standards. These standards illustrate what each of the Anchor Standards might look like as students engage in the Artistic Processes within an artistic discipline. Performance standards are written for pre-kindergarten through eighth grade as grade level standards, and at the high school in three proficiency levels; Proficient, Accomplished, Advanced. All Performance Standards align to the eleven overarching Anchor Standards.

# **HIGH SCHOOL ARTS AND HUMANITIES**

## Kentucky Academic Standards – Arts and Humanities – High School

At the high school level, students may choose to specialize in one or more art forms. Specialization will enable students to study an art form in an in-depth manner and work toward achieving proficiency and mastery in creating, performing, and responding to their chosen art form. Students who specialize in an art form will participate in performance-based arts courses designed to develop skills and understanding that will enable students to use the art form as a high level communication tool. This is accomplished through the development of skills in the processes that artists engage in to make the arts.

Students choosing not to specialize in an art form will move beyond the grounding in the arts achieved at the middle school level toward proficiency in the arts. Emphasis for these students should be placed on exposing students to a variety of arts through active experiences, and developing further understanding and appreciation of the historical and cultural significance of the arts. A higher emphasis on the process of responding to the arts is a natural outcome of this more general approach to art education, however engagement in the creative aspects of the arts remains critical in the general education of all students and promotes deep understanding and appreciation of the arts.

### The Standards

The standards are directly related to the *National Core Arts Standards*. These are process standards, which are designed to engage students in artistic processes and creative expression as put forward in Senate Bill 1 (2009), KRS 158:6451, Section 1, Schools shall develop their students' ability to: "Express their creative talents and interests in visual arts, music, dance, and dramatic arts".

### Standards Organization

The standards are organized around four arts processes:

1. **Creating:** Conceiving and developing new artistic ideas and work  
Creating involves planning and creating new dance, media arts, music, theatre, or visual arts. Creating may involve improvising in music, dance or theatre. Improvising is the composing of new music, reciting/acting new dramatic material, or creating new dance movements on the spur of the moment.
2. **Performing/Producing/Presenting:** Realizing artistic ideas and work through interpretation and presentation

Performing is limited to the performing arts of music, dance and theatre. Performing generally involves sharing previously created works with an audience. Although the process of performing involves following a creative plan conceived by a composer, playwright or choreographer, there is still opportunity for creative interpretations within the performance.

Producing is the process of sharing work in the area of media arts. Since media arts productions do not result in performances, the sharing process is different from the performing arts. Media artists still follow the same steps in the creation of works and preparation of works for sharing with others; however the result is more often a product such as a video or video game.

Presenting is often associated with sharing in more formal settings such as exhibition in the visual arts. The same steps to prepare works for presenting are considered-the audience, venue and communication aspects of an exhibition..

3. **Responding:** Understanding and evaluating how the arts convey meaning

Responding to the arts involves having the viewer take a close look to interpret the meanings in artistic works. The arts are created for the purpose of communication. Responding to them engages a thinking process that enables the viewer/audience to gather the intent of the work and the message being share by the artist.

Responding also involves the process of evaluating art works. The viewer/audience will apply criteria to evaluate the effectiveness of artistic works.

4. **Connecting:** Relating artistic ideas and work with personal meaning and external context

Connecting involves both looking inward and outward. Artists use personal experiences and gained knowledge to inform their own creative works. They also relate artistic ideas with the world around them; to society, culture, and history. This deepens the understanding of the work and appreciation of those who create the arts.

### **Anchor Standards**

There are eleven Anchor Standards that are common across all art forms. These standards illustrate steps that are taken within each of the Artistic Processes.

### **Performance Standards**

Each artistic discipline has a set of performance standards. These standards illustrate what each of the Anchor Standards might look like as students engage in the Artistic Processes within an artistic discipline. Performance standard are written for pre-kindergarten through eighth grade as grade level standards, and at the high school in three proficiency levels; Proficient, Accomplished, Advanced. All Performance Standards align to the eleven overarching Anchor Standards.
